Subject index

Ab initio 281
Ab initio calculations 263
Activation energies 359
Adiabatic approximation 163
Adsorption 17
Atomic natural orbitals 291
Azines 1

Basis sets 291
Benzenoids 143
Bonding properties 39
Bond order 213
Born-Oppenheimer approximation 163
Bulk properties of 253

Carbon monoxide 17
Cauchy moments 239
Charge density 213
Clusters 39
Collision efficiency 63
d^3 Complexes 85
Configuration interaction 111
Correlation energy 207
Correlation factor 207
Correlation methods 263
Coupled cluster method 29

Density functional theory 239
Density of states 39
Diabatic anharmonic potentials 369
Diabaticity 333
Diatomic molecules 191
Dipole moment 263
Dissociation energies 359
Dynamic crystal field theory 85

Electron affinities 207
Electronic structure 409
Energy distribution of transition components 369
Enumeration 143,307
Equivalence restrictions 323
Excited electronic states 191
Expectation value 29
Exponents 281

Finite cluster MO calculations 253
Franck-Condon transitions 369
Functional density 207

Gas phase O_2^- 409
Gaussian basis sets 191
General contraction 291
Gradient 281

He_2^+ 333
Heats of formation 383
Hellmann-Feynman theorem 29
High-spin potentials 323
Hydrogen fluoride 253
Hyperfine coupling constants 111

Intrinsic basicities 1
Ionization energies 207
Iron silicide 39
Isoelectronic energy changes 57

KNO_2 doped $NaNO_2$ single crystals 395

Level crossings 163
Levy equation 57
Li^+ binding energies 1
Lifetime 333
$LiXH_n$ and $BeXH_n$ compounds 383

MINDO/SR 39
MO 281
Multi-exponential decay 63

Nitramines 359
NO 323
NO_2^- ions 395
Non-rigid isomers 307

One-electron properties 29
d Orbitals 17
Optimization 281

Pentazine 343
Periodic table 143
Phase-space dynamics 225

Polarizabilities 29
Polymers 253
Predissociation 333
Propane cation 111
Properties 263
Pseudopotentials 123

Quantum and classical regime 369
Quantum theory 225
Quark atoms and molecules 57

Resonance energy 213
Resonance structures 213
Resonance theory 213
Rydberg states 409

Schrödinger equation 225
SCF calculations 191
Semiclassical approximation 163
Spectroscopic MRINDO/S 343
Spin-orbit operator 123
Structures 383
Subduced cycle index 307
Symmetry group 143

Table of marks 307
s-Tetrazine 343
Thermal decomposition 359
Time-dependent Kohn-Sham theory 239
Time-resolved fluorescence 395
Topological characteristics 143
Transition metals 17, 123
s-Triazine 343

Unimolecular fall-off 63
Unit subduced cycle index 307

Van der Waals states 323
Vibrational analysis 359
Vibronic coupling 85
Vibronic selectivity 85
